REMARKS

This is UNEVALUATED Information

25X1

On 1 December 1954, construction of a new fuel depot began on premises of the former Sprengchemie Werk in the area of Neuendorf-Hohensaaten-Oderberg. Fuel tanks of 15 m length and 2 m in diameter were dug in. About 200 fuel tanks have so far been delivered. Two sidings were laid from the Saaten-Neuendorf railroad station to the new depot. The installation will cover 200 hectares of wooded area which was previously confiscated. The construction was supervised by Lieutenant Colonel Birke (fnu) who had his office in Strausberg. Officer in charge of the installation was Lieutenant Golland (fnu). The installation had telephone number "Oderberg 20". At present, 200 civilians are employed as workers. An increase of the construction work was to begin on 1 March.

25X1

Comment. The construction of the KVP central fuel and lubricants depot at Hohensaaten was previously reported. If the observation of the delivery of 200 fuel tanks is correct, the depot will have a capacity of 10,000 cbm. The officers mentioned are reported for the first time.
